OCCE4001 - SOFTWARE TESTING

PRACTICAL LIST – AY: 2026- 27

Sr. no.	Title
5.	Title: Bug Tracking and Defect Management using Jira Aim: To understand the software defect lifecycle by creating, assigning, tracking, and resolving software bugs using Jira. Software/Tools Required • Jira Cloud • Web Browser • Internet Connection Procedure 1. Create a Jira account and log in. 2. Create a Software Testing project. 3. Create a new Bug issue. 4. Enter bug details such as summary, description, severity, and priority. 5. Assign the bug to a developer. 6. Update the bug status through different stages (To Do → In Progress → Done). 7. Verify the resolved bug and close the issue. 8. Record the observations. Expected Outcome: Students understand the complete defect management process using an industry-standard bug tracking tool. Result: The software defect lifecycle was successfully managed using Jira
Step 1: Create a Bug Tracking Project Log in to Jira and create a dedicated Bug Tracking project. 1. Open Jira. 2. Click Projects → Create Project. 3. Select Software Development → Bug Tracking. 4. Click Use Template. 5. Enter Project Name and Project Key. 6. Click Create Project.

Step 2: Create Custom Issue Types

Create additional bug-related issue types if required.

1. Go to **Settings** → **Issues**.
2. Select **Issue Types**.
3. Click **Add Issue Type**.
4. Enter the Issue Type name.
5. Save the configuration.
6. Associate the Issue Type with the project scheme.

Step 3: Configure Bug Fields

Configure the fields required for bug reporting.

1. Navigate to **Screens**.
2. Create a new screen.
3. Add the following fields:
 - Summary
 - Description
 - Priority
 - Assignee
 - Attachment
 - Labels
4. Save the screen configuration.

Step 4: Customize the Bug Workflow

Configure workflow stages for bug management.

1. Open **Project Settings**.
2. Select **Workflows**.
3. Edit the existing workflow.

OCCE4001 - SOFTWARE TESTING

4. Add the following statuses:
 - Open
 - Assigned
 - In Progress
 - Fixed
 - Testing
 - Verified
 - Closed
 - Reopened
5. Create transitions between statuses.
6. Publish the workflow.

Step 5: Create a Kanban/Scrum Board

Create a board to visualize bug progress.

1. Click **Boards** → **Create Board**.
2. Select **Kanban Board** or **Scrum Board**.
3. Choose **Board from Existing Project**.
4. Enter the board name.
5. Associate it with the Bug Tracking project.
6. Save the board.

Step 6: Configure Bug Priorities

Define priority levels for bugs.

1. Open **Jira Settings** → **Issues** → **Priorities**.
2. Configure:
 - Highest
 - High
 - Medium
 - Low
 - Lowest
3. Save the settings.

Step 7: Create a Bug Ticket

Create a new bug report.

1. Click **Create**.
2. Select **Issue Type: Bug**.
3. Enter:
 - Summary
 - Description
 - Priority
 - Assignee
4. Attach screenshots if available.
5. Click **Create**.

The screenshot shows the Jira interface for a project named 'Test project - J'. The left sidebar contains a navigation menu with options like 'UX board', 'Kanban board', 'Reports', 'Releases', 'Issues and filters', 'Pages', 'Components', 'RTM', and 'Project settings'. The main area is titled 'Defects' and shows a hierarchical view of issues. Under 'TP-1 Manual control', there are several issues listed, including '1.1.1. Incorrect flight path', '1.1.2. Illegible coordinate', '1.1.3. Incorrect autopilot', and '1.1.4. Manual control'. The 'Details' tab is selected, showing a 'New direct link' button and a list of issues with their status (Summary of Issue) and dates (02/03/2020). The 'Indirect relations' section is also visible, showing a list of issues with their status (Summary of Issue) and dates (02/03/2020).

Step 8: Assign the Bug

Assign the reported bug to a developer.

1. Open the created bug ticket.
2. Select **Assignee**.
3. Choose the responsible developer.

OCCE4001 - SOFTWARE TESTING

4. Change status from **Open** to **Assigned**.

Step 9: Start Bug Fixing

Developer begins working on the defect.

1. Open the assigned bug.
2. Change status to **In Progress**.
3. Investigate the issue.
4. Implement the required fix.

Step 10: Mark the Bug as Fixed

After implementing the solution:

1. Update the ticket with fix details.
2. Change status to **Fixed**.

Step 11: Generate Bug Reports

Generate project reports for monitoring defects.

1. Open **Reports**.
2. Select Bug Summary Report.
3. Configure filters.
4. Generate and export the report.
