OCCE4001 - SOFTWARE TESTING

The screenshot shows the GitHub 'Create a new repository' page. The 'General' section is active, showing the 'Owner' as '23CE021-NishitPDesai' and the 'Repository name' as 'Software-testing'. A green checkmark indicates 'Software-testing is available'. The 'Description' field is empty. The 'Configuration' section shows 'Choose visibility' set to 'Public', 'Add README' set to 'Off', 'Add .gitignore' set to 'No .gitignore', and 'Add license' set to 'No license'.

Enter name of repository and choose visibility (public/private) and Click button “Create repository”

The screenshot shows the GitHub repository page for 'Software-testing'. The repository is public. The page includes a 'Start coding with Codespaces' section, an 'Add collaborators to this repository' section, and a 'Quick setup' section. The 'Quick setup' section provides a URL to clone the repository: `https://github.com/23CE021-NishitPDesai/Software-testing.git`. Below this, there is a section for creating a new repository on the command line with the following commands:

```
echo "# Software-testing" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/23CE021-NishitPDesai/Software-testing.git
git push -u origin main
```

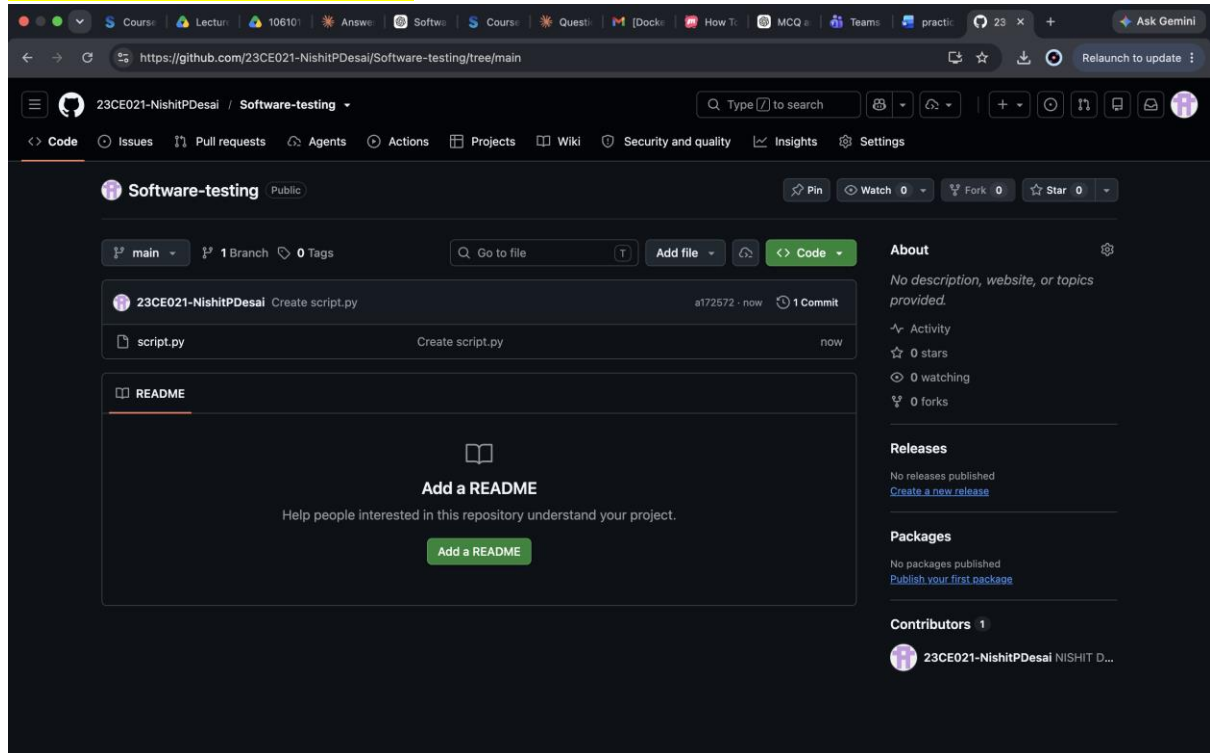

First view of repository.

Now Go to the Project folder .

`git init`

DEVANG PATEL INSTITUTE OF ADVANCE TECHNOLOGY AND RESEARCH
OCCE4001 - SOFTWARE TESTING

```
git add .  
git commit -m "first commit"  
git branch -M main  
git remote add origin https://github.com/demo/Software-testing  
git push -u origin main
```

First commit is successful Done.

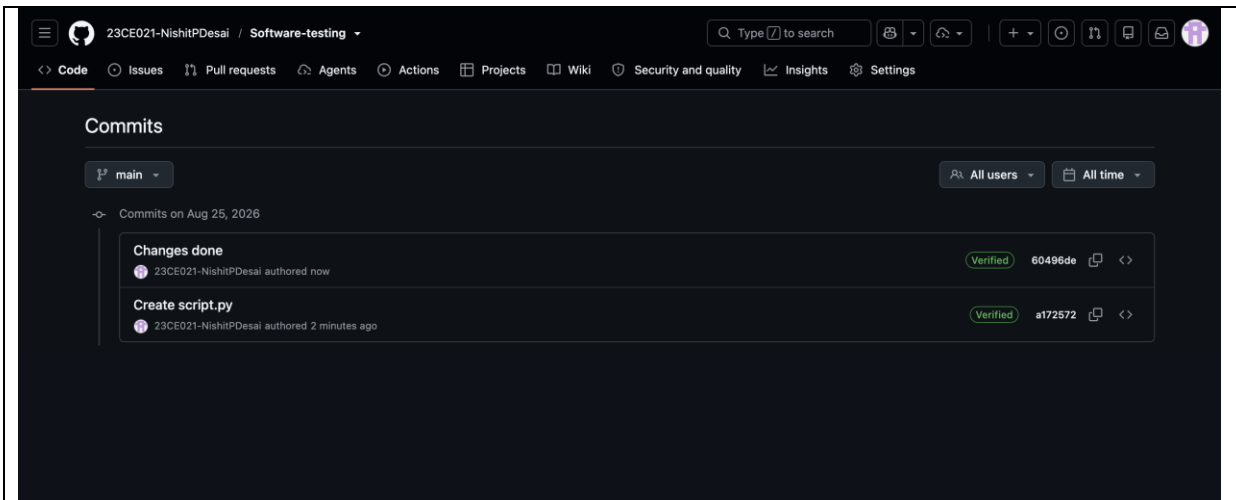

Now pull from github, First check remote as local machine

```
git remote -v  
git pull origin main
```

Now commit changes to Github.

```
git add .  
git commit -m "changes Done"  
git push origin main
```
